**Introducing the many flavours
of TRIAXYS....**

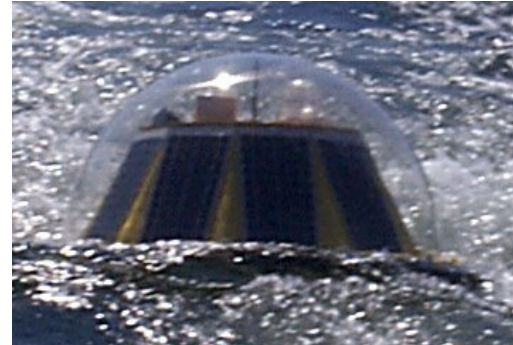

TRIAXYS DIRECTIONAL WAVE BUOY

Our original TRIAXYS measures wave height, direction and period in near real-time!

Users can monitor and control the buoy from the comfort of their office.

TRIAXYS CURRENTS BUOY

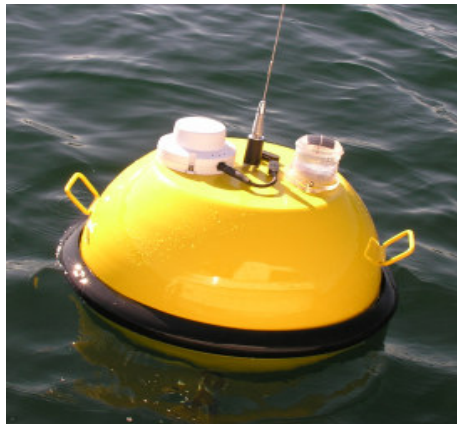

Measures waves AND currents in one device!

Eliminates the need for seabed mounted sensors.

TRIAXYS MINI BUOY

Designed for short, fast and easy deployments!

Weighing only 60 kg, this small, lightweight buoy is simple to deploy from a variety of vessels.

GPS BUOY

Designed and built to exacting military specifications!

Uses GPS technology to obtain precise water level elevations anywhere around the globe.
